

VIII. Scientific Conference

The Exhausted Globalization: Dwindling Growth, Rising Tensions

17. January 2019, 9.00 until 13.30 hours (with lunch) – Meeting Room Hayek

German Economic Institute, Konrad-Adenauer-Ufer 21, 50668 Cologne

Signs of crisis dominate current debates: Social cohesion is said to be dwindling, political structures and multilateralism are eroding and the sustainability of economic conditions is questioned. Rapid innovations, disappointments with negative effects of economic growth, increasing uncertainty and conflicts due to globalisation and digitalisation are in combination with a seemingly decreasing political power of great importance for the further development of our societies. How can the “exhausted globalization” be resuscitated? What are the challenges for the wealth and growth of nations and how are they met by inclusive growth theories and approaches? What are similarities, what are differences between approaches of economists and sociologists in dealing with these topics?

We are very much looking forward to our Round Table Debate!

Agenda

- 09.00 [Welcome Note and Introduction](#)
